

Alex Mercer

FULL STACK PYTHON DEVELOPER

Email: alex.mercer@email.com | **Phone:** +1 (555) 019-2834 | **GitHub:** github.com/alexmerc | **Location:** New York, NY

Professional Summary

Versatile and results-driven Full Stack Python Developer with 4+ years of professional experience building high-performance web applications and AI integrated backend services. Proficient in Python web frameworks (FastAPI, Django) and modern frontend platforms (Next.js, React). Experienced in implementing WebSockets for real-time telemetry, designing scalable relational/noSQL databases, and managing containerized cloud environments.

Technical Skills

Languages: Python (OOP, Asyncio), JavaScript (ES6+), SQL, HTML5/CSS3

Backend: FastAPI, Django, Flask, REST APIs, WebSockets, Uvicorn

Frontend: Next.js, React, Tailwind CSS, Redux, Recharts

Databases & Tools: PostgreSQL, Redis, Neo4j, Docker, Git, AWS (S3, EC2)

Professional Experience

Senior Full Stack Developer | TechNova Solutions, New York, NY

June 2024 - Present

- Architected a real-time analytics platform using FastAPI and WebSockets, reducing payload latency by 35%.
- Built an AI-driven text extraction system utilizing the Google Gemini API to parse complex business PDF credentials automatically.
- Managed and structured PostgreSQL databases, implementing optimization indexes that reduced search query response times by 40%.

Software Engineer (Full Stack) | DevCore Systems, Boston, MA

Jan 2022 - May 2024

- Developed and styled interactive dashboards in Next.js and Tailwind CSS, generating positive feedback from 5,000+ daily active users.
- Designed and documented secure Python REST APIs using Django REST Framework, ensuring high test coverage.
- Containerized multi-service applications using Docker Compose, streamlining onboarding time for new developers.

Key Projects

AURA: AI Mock Interviewer & Behavioral Analyst

- Designed a full-stack platform utilizing a FastAPI backend and a Next.js frontend to stream video frames over WebSockets.
- Integrated MediaPipe models to track candidate shoulder posture, face direction, and eye contact telemetry logs in real-time.

GraphInsight: GraphRAG Search Engine

- Engineered an advanced RAG database pipeline using Neo4j to store document relations and vector spaces.
